

# Listen to this!

**In May, a new powerful media line arrives in a super cool design - how does that sound?**

Flying Tiger Copenhagen hits the right note with a brand-new media line. The powerful new products are a stylish collection of electronic essentials and sounds like a true winner. The new media darlings are created by Flying Tiger Copenhagen's own product designer and are part of the fixed assortment.

With 11 different products the new media line ensures you have everything you need to stay digital all day. It's released in four cool colour combinations and covers everything from comfortable headphones and earbuds to chargers and indispensable extra devices – e.g. an eco-friendly smartphone cover made from recycled plastic.

**Arrives in stores in May and costs from 30 kroner / 4 euro**
